## Editorial

---

Dear Colleagues,

We are happy to introduce the first issue of CRO- *Case Reports in Odontology* to the world fraternity associated with the disciplines such as Dental Anatomy, Oral Medicine and Radiology, Oral and Maxillo-Facial Surgery, Oral and Maxillo-Facial Pathology, Oral Microbiology, Periodontology, Implantology, Prosthodontics and Rehabilitation, Pedodontics and Preventive Dentistry, Orthodontics, Oral and Maxillo-Facial Orthopedics, Restorative and Esthetic dentistry.

*Case Reports in Odontology* is a peer-reviewed, open access e-journal, which covers, reports and publishes clinically and academically interesting and unique case reports in all the above specified fields of dentistry. It aims to provide high-quality information and a fresh perspective on key topics along with up-to-date coverage on various fields of dentistry. Therefore, we aim to generate and disseminate new knowledge on the fields above and expect to expand the circle of readers and contributors across the globe.

As the primary aim of the CRO- *Case Reports in Odontology* is to generate and disseminate new knowledge on the areas specified above, it provides immediate open access to its all content to the global academic and research fraternity. We believe that this will help in catering to the research and academic needs of those who are in search of knowledge as well as in getting more citations to our contributors. The *Case Reports in Odontology* allows and

permits the community of students, teachers, researchers and scholars to read, copy, print, download all our articles as well as all the published complete issues. We also permit libraries and databases to search and distribute all the content of the *Case Reports in Odontology*.

The first issue of the CRO includes two academically very interesting case reports which may offer insight into the cases reported and encourage other scholars across the globe to report their experiences. With this beginning, we hope that the CRO will serve as a platform for the research scholars across the globe to share their clinical and research experiences with the world fraternity with the aim of making the research of an individual beneficial for all those related.

I also take this opportunity to welcome all the members of the editorial board and hope that their cooperation will help us in achieving the aims of the CRO- *Case Reports in Odontology*.

With Kind Regards,

**Dr. Syed Wali Peeran**

Department of Periodontology and Oral Implantology,  
Faculty of Dentistry  
Sebha University  
Sebha, Libya

**Editor-in-Chief**
